

AVL DITEST SCOUT

INTELLIGENT GUIDED DIAGNOSTIC

AVL DITEST SCOUT- MORE BENEFITS FOR YOUR WORKSHOP!

BY PEOPLE FROM PRACTICE FOR PEOPLE FROM PRACTICE

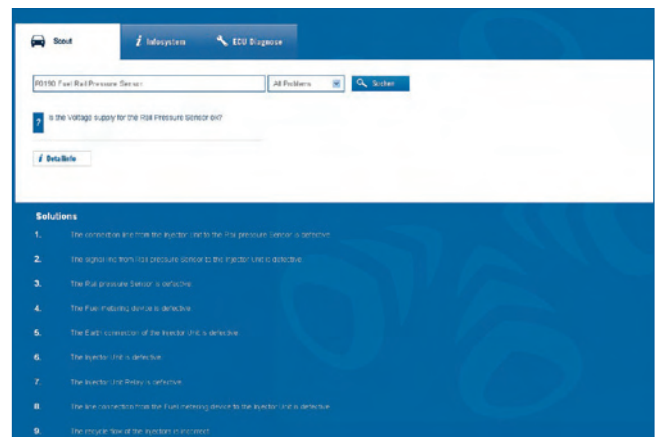

AVL DiTEST expert knowledge in your workshop - Due to their increasing complexity modern vehicles become increasingly difficult to diagnose and repair for independent workshops. The intelligent diagnostics system AVL DiTEST SCOUT makes every workshop a diagnostics expert, even in case of difficult faults or faults beyond the ordinary.

AVL DiTEST vehicle experts fed the AVL DiTEST SCOUT software with a large number of diagnostics cases, which the workshop user can link with their own experience to be guided to the solution or repair in an efficient and target-oriented way.

EVERYTHING ON ONE PC PLATFORM

Target-oriented from the fault symptom to repair – For modern workshops electronic vehicle diagnostic is the ultimate component of success. But often there are painfully long diagnostic processes, fragmentary technical information and incorrect spare part orders.

The AVL DiTEST SCOUT offers fully integrated and automated operations. It thus guides you step by step from the fault symptom to the solution and supports you in repairs and part orders. This helps to simplify the daily operations in the workshop, reduce throughput times and increase customer satisfaction.

UNLIMITED USE

Diagnostic expert for various brand manufacturers and models – your workshop no longer needs to reject vehicles due to lack of diagnostic competence.

AVL DiTEST SCOUT is an online-based system. Software expansions such as new manufacturers, models, systems and functionalities are continuously made online without additional installation requirements. Installation of updates is made automatically. This makes the AVL DiTEST Scout perfectly easy to maintain.

FUTURE SOLUTIONS FOR TODAY

VEHICLE DIAGNOSTIC WITH UNRIVALLED SPEED! IN FIVE STEPS FROM THE ERROR CODE TO REPAIR

1. VEHICLE ACCEPTANCE

Important questions concerning fault diagnostic and repair can already be answered upon acceptance of the vehicle in the workshop. The AVL DiTEST XDS 1000 vehicle diagnostic reads all faults stored in all electronic systems of the vehicle thus shortening the diagnostic process. The vehicle data and diagnostic results are automatically transferred to the SCOUT via an interface. No more redundant data input.

2. DIAGNOSTIC CASE

AVL DiTEST SCOUT helps you to successfully achieve results. You may enter the diagnostic via error codes, fault symptoms or service information. SCOUT offers the correct diagnostic strategy. Intelligent input tools allow rapid selection of the correct diagnostic case even in case of ambiguous inputs, similar to internet search engines.

3. COMPONENT TEST

AVL DiTEST SCOUT is an online-based system. It consists of an intelligent diagnostic core which allows dynamic processing of diagnostic strategies. The faulty vehicle component is identified step by step. Detailed instructions help you with component testing. Diagnostic strategies are continuously expanded online according to the experience and feedback of the users. Automatic optimization of diagnostic cases including solutions and test instructions allows efficient and precise diagnostic.

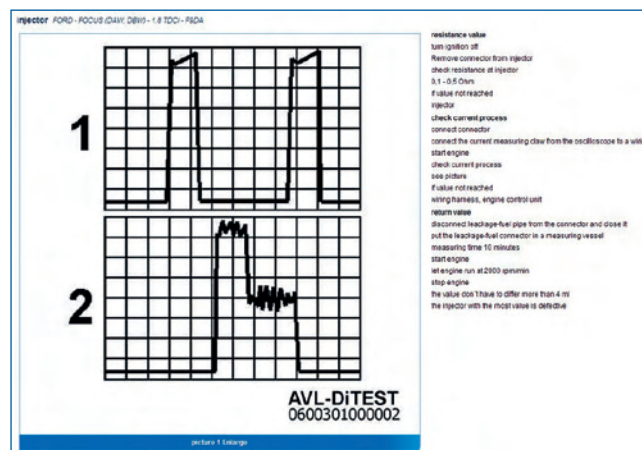

4. TECHNICAL INFORMATION

The required technical information from the AVL DiTEST XIS information system is made available to the user with utmost precision. The information system is an indispensable aid in the workshop and offers comprehensive vehicle information. Diagnostic and component tests such as circuit diagrams or disassembly/installation instructions and useful tips&tricks are available. The precise interaction between diagnostic case and technical information is an additional factor to save time.

5. SPARE PARTS

The diagnostic case brings you to the clearly identified error cause. The automatic transfer of the component to the electronic parts catalogue saves effort. No more incorrect orders, redundant data input and long search for the correct spare part. AVL DiTEST SCOUT transmits the spare part to the connected parts catalogue where the part can be directly ordered - the easiest and clearest way of diagnostic.

DISCOVER YOUR BENEFITS AVL DiTEST SCOUT SAVES TIME AND MONEY

AVL DiTEST Scout: a strong diagnostic solution expandable to a strong workshop system. Combine AVL DiTEST Scout with additional modules and increase the strength and efficiency of your workshop.
